## Professional Summary

Full-stack developer with 2+ years of experience in TypeScript, Next.js, Node.js, MongoDB, and HTML/CSS. Skilled in building scalable applications, RESTful APIs, and implementing TDD and accessibility standards. Experienced with integrating Generative AI features and tools. Familiar with Docker, quick to learn, and a proactive team player focused on delivering high-quality software and driving project success.

## Technical Skills

**Frontend:** React, TypeScript, Next.js, HTML/CSS, Tailwind, Zustand, Material UI, JavaScript

**Backend:** Node.js, Express.js, MongoDB, Mongoose, JWT, GoLang, SQL, PostgreSQL, Redis, Socket.io, NATS, Sentry

**Tools:** Git/GitHub, Bitbucket, VS Code, Postman, LLM-based AI Assistants

**Additional Skills:** RESTful APIs, CI/CD, Docker, Bash Scripting, Linux, OpenAI APIs, Prompt Engineering, AI Feature Integration

## Experience

### Software Development Engineer-I

Nov-2025 - present

*Underpin Technology FZ-LLC.*

*Remote*

- Worked on real-time socket-based communication to connect and manage live game sessions.
- Designed and implemented a ledger system to track session-wise transactions and maintain user wallets accurately.
- Developed features for a betting application, handling sports odds, betting exchanges, and settlement logic.
- Focused on performance, data consistency, and reliability for high-frequency transactional systems.
- Worked on slot casino game maintenance with Redis, balance logic, and bug resolution.

### Software Development Engineer-I

Aug-2023 - Aug-2025

*Languify Pvt. Ltd.*

*Bhopal*

- Developed Spoken English Proficiency (SEP) system for **Cambridge University**, handling 10,000+ assessments/day.
- Applied Test-Driven Development(TDD) practices to deliver high-quality, maintainable and reliable code.
- Implemented Redis caching to optimize performance for user-specific API responses, reducing database load
- Integrated **OpenAI prompt** into core product features to enhance personalized learning and content generation.
- Worked on the IELTS interview flow, assessment creation, webhook integration, and feedback generation.

### Freelance MERN Developer

Sept-2022 - July-2023

*Remote*

- Designed and deployed backend systems for diverse industries, integrating Node.js, MySQL & API solutions.
- Successfully delivered and deployed projects-**Nana Dairy Farming, Ashi Helmet Store, and Tenant Network**.
- Developed features such as Razorpay integration, email authentication, WhatsApp verification, and analytics.
- Improved performance by unit testing, debugging, and database optimization following TDD and SOLID principles.

### Node Backend Developer (Intern)

Jan-2022 - Aug-2022

*Jungleworks Pvt. Ltd.*

*Chandigarh*

- Acquired practical skills in Node.js, Express, MySQL, and JavaScript by working on live projects.
- Worked on features such as a coupon system, commission settlement, email triggering, and debugging.
- Managed monthly sprints for the live project **Rappo**, ensuring timely delivery of tasks and features.

## Projects

### Tenant Network (Real Estate) | React, Node, MySQL

- Communicated with clients to gather requirements and deliver projects on time.
- Designed and developed the entire product, including frontend, backend, and deployment on Hostinger VPS.
- Implemented WhatsApp OTP authentication, used Google Cloud Bucket, and optimized the platform for SEO.

## Education

### Changdigarh University

BE- Computer Science and Engineering – GPA: 7.56

August-2022

Gharuan, Punjab
